ALI RAZA MUJAHID

Full-Stack Developer

Okara, Pakistan | +92 300 7994674 | alirazamujahid102@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Computer Science Student and Full-Stack Developer in Laravel-based web application development, RESTful API design with Sanctum authentication, and relational database management using MySQL. Practical experience building and debugging full-stack applications covering authentication, authorization, and email-driven workflows. Seeking a Junior Laravel Developer role to apply strong PHP/Laravel fundamentals and full-stack development skills in a collaborative engineering team.

TECHNICAL SKILLS

Frontend: Javascript, React.js, jQuery, HTML5, CSS3, Bootstrap,

Backend: PHP, Laravel, REST API Development, Laravel Queue&Jobs

Database: MySQL

Tools: Git, GitHub, VS Code, Postman, ThunderClient

Additional: Livewire, Sanctum API, Authentication

PROJECTS

NotesHub – Full-Stack Notes Management Application | Laravel 13, MySQL, Bootstrap | GitHub Link

- Developed a full-stack notes management system with user authentication, role-based access control, and category-organized note-taking using Laravel and MySQL.
- Implemented secure password recovery via a 3-step OTP verification flow (email request → OTP verification → password reset), using custom middleware to prevent users from skipping steps by directly accessing protected routes.
- Designed authorization logic using Laravel Gates to enforce three access levels: authenticated-user-only routes, admin-only routes, and note-ownership validation (users can only edit/delete their own notes).
- Built full CRUD functionality for notes and categories, including a favorites/starring system and a search feature for quickly locating notes.
- Created an admin panel for user management, allowing admins to view, search, and manage all registered users and their roles.
- Integrated Laravel Mail with SMTP to deliver OTP verification codes via HTML email templates during the password reset flow.
- Structured the database with Eloquent relationships (notes belong to users and categories) and used Laravel migrations and seeders for consistent schema and test data setup.

EDUCATION

ADP-Computer Science| Affiliate Superior College| GC University Faisalabad | Jul 2026

Relevant Coursework: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Computer Networking

HEC (ICS) | SAHIWAL - BISE | 2022 - 2023

ADDITIONAL

Frontend: English, Urdu

Availability: Immediate available for full-time, internship or remote job, willing to relocate,

Open Source: 20+ public repositories showing my hardworking projects
